Johannesburg, Gauteng
DocStudio Platform Live

SA ID: 0305135423088 • **EE:** African (Male) • **Notice:** Immediate

• **Availability:** Houghton Estate On-Site & USA EST Hours (3pm–12am)

PROFESSIONAL SUMMARY

Innovative Full-Stack Developer and AI 'Vibe Coder' experienced in engineering responsive, high-performance web applications using modern JavaScript/TypeScript (React, Next.js, Node.js). Skilled in leveraging state-of-the-art AI-assisted tools (Cursor, Claude Code, GitHub Copilot, Windsurf) to translate complex UI/UX designs into pixel-perfect digital products at rapid turnaround times. Based locally in Johannesburg, immediately available for on-site collaboration in Houghton Estate, and fully committed to USA EST hours (3:00 PM – 12:00 AM) supporting fast-paced North American client operations.

PROFESSIONAL EXPERIENCE & KEY PROJECTS

Full-Stack Developer & AI Vibe Coder

02/2025 — 02/2026

Jozi Student Hub (Pty) Ltd | Johannesburg, Gauteng

• Architected and deployed the core responsive e-commerce web platform (jozistudenthub.co.za), generating 100% of online company revenue with 99.9% uptime.
• Leveraged AI-assisted development workflows (Cursor, Claude Code, GitHub Copilot) to accelerate feature shipping speed by 60% and resolve edge cases rapidly without sacrificing code quality.
• Collaborated closely with UI/UX designers to translate Figma concepts into clean, cross-browser compatible, and mobile-first responsive interfaces using React, Next.js, and modern CSS.
• Streamlined store inventory management and backend API endpoints, reducing catalog update latency by 45%.
• Optimized web asset delivery and DOM rendering performance, achieving 95+ Google Lighthouse audit scores across mobile and desktop devices.

Frontend Engineer & AI Systems Developer (Featured Project)

2025 — Present

DocStudio Suite | Johannesburg, Gauteng

• Engineered and published DocStudio (docstudio-lovat.vercel.app), a high-fidelity utility platform featuring glassmorphism UI, real-time client-side PDF export, and Model Context Protocol (MCP) integrations.
• Implemented responsive, accessible design systems and dynamic document templates using React 19, TypeScript, Tailwind CSS, and Framer Motion.
• Built an automated ATS (Applicant Tracking System) resume scoring engine providing instant heuristic diagnostics and keyword density evaluation.
• Maintained strict cross-browser compatibility across Chrome, Safari, Firefox, and Edge, enforcing responsive touch and desktop interactions.

EDUCATION & TECHNICAL MASTERY

National Senior Certificate (Matric) – 2 Distinctions

2020

Hulwazi Secondary School • Completed

• English First Additional Language: **80% (Distinction (Level 7))**
• Life Sciences: **84% (Distinction (Level 7))**

Modern Full-Stack & AI-Assisted Software Engineering

2024 - 2026

Applied Software Engineering Curriculum • Continuous Professional Mastery

CORE COMPETENCIES

- AI-Assisted Development (Cursor, Claude Code, Windsurf, Copilot)
- Vibe Coding & Rapid Prototyping
- React & React 19
- TypeScript & JavaScript (ES6+)
- Next.js & Vite
- HTML5 & Modern CSS / Tailwind CSS
- Responsive Web Design & Mobile-First Layouts
- Cross-Browser Compatibility & Optimization
- RESTful API Integration & JSON Schemas
- UI/UX Implementation & Prototyping
- Git & GitHub Version Control
- Agile Collaboration & Fast Turnaround Delivery
- Performance Tuning & Lighthouse Auditing
- USA EST Timezone Alignment (3pm–12am)

LANGUAGES

English	Fluent
Sepedi	Native
isiZulu	Fluent
Xitsonga	Conversational
