PROFESSIONAL SUMMARY

Innovative Full-Stack Developer and AI Vibe Coder experienced in engineering responsive, high-performance web applications using modern JavaScript/TypeScript (React, Next.js, Node.js). Skilled in leveraging state-of-the-art AI-assisted tools (Cursor, Claude Code, GitHub Copilot and Antigravity) to translate complex UI/UX designs into pixel-perfect digital products at a rapid pace while maintaining code quality. Based in Johannesburg, immediately available for on-site employment. Fully committed to USA EST hours (3:00 PM - 12:00 AM).

PROFESSIONAL EXPERIENCE & KEY PROJECTS

Full-Stack Developer & AI Vibe Coder

02/2025 — 02/2026

Jozi Student Hub (Pty) Ltd | Johannesburg, Gauteng

- Architected and deployed the core responsive e-commerce web platform (jozistudenthub.co.za), generating 100% of online company revenue with 99.9% uptime.
- Integrated payment platforms (Payfast and Yoco) as per client request. Added email receipt automation for order tracking.
- Included Abandoned Cart recovery as well as a dedicated admin dashboard with revenue tracking and product management.
- Leveraged AI-assisted development workflows (Cursor, Antigravity & GitHub Copilot) to accelerate feature shipping speed by 60% and resolve edge cases rapidly without sacrificing code quality.
- Collaborated closely with UI/UX designers to translate Figma concepts into clean, cross-browser compatible, and mobile-first responsive interfaces using React, Next.js, and modern CSS.
- Streamlined store inventory management and backend API endpoints, reducing catalog update latency by 45%.
- Optimized web asset delivery and DOM rendering performance, achieving 95+ Google Lighthouse audit scores across mobile and desktop devices.
- Handled the SEO overhead to make sure the store ranks high on google search for user accessibility.

Software Developer (AI Assisted)

07/2025 — Present

SteigerOnline | Johannesburg, Gauteng

- Launched the Company Website for clients to view the company's work.
- Launched several projects under the SteigerOnline brand, assigning subdomains to every subsequent project.
- Launched a CV generator (DocStudio), which was utilized to author and engineer this CV.
- Developed a social platform that allows users to chat and make end-to-end encrypted voice and video calls via the browser.
- Developed a web app that allows a user to control their desktop from their mobile device using a python script with millisecond touch-navigation latency.
- Developed a 3D QR Code generator that allows users to generate scannable 3D illustrations.
